

Universal

Hypo-allergenic disposable wipes with neutral detergent

Item no.: 41153

Item no.: 41133

Easy, gentle cleaning without the use of protective gloves

Cleaning tasks at home and at work are often difficult when using disposable wipes that require protective gloves. We have therefore developed a new universal wipe with hypo-allergenic cosmetic approved ingredients.

The wipes contain surface-active surfactants, which ensures the wipe removes grease and dirt while being gentle on the skin.

The wipes are extra durable and perforated with holes, which absorb grease and dirt, so after drying is not necessary.

The wipes are both cross and z-folded so that the wipes can be removed from the packages individually folded and ready for use.

Application

Cleaning of all surfaces that can withstand water e.g. tables, sinks, furniture with vinyl and leather upholstery, stove, refrigerator, car dashboards, etc. The wipe is also suitable as a stain remover on textiles and to remove mold from window frames, damp corners and grease from kitchen furniture and equipment.

As the wipes do not contain anionic surfactants, neutralization of cationic and disinfectants is avoided. The wipes are therefore, suitable for cleaning soiled surfaces immediately before disinfected with alcohol free disinfectant wipes or disinfectants.

Note

The disposable wipes are produced in two sizes; maxi and mini.

Item no. 41153: Universal Maxi carton of 12 packets
1 packet contains 20 wipes, 43×30 cm

Item No. 41133: Universal Mini carton of 20 packets
1 packet contains 25 wipes, 20×30 cm

Content

Ingredients: <1% surfactant Preservatives: Sodium Benzoate, Potassium Sorbate

Perfume and colour free
contains lactic acid
pH ca. 5.2 (Skin neutral)

Environmental labeling

pH-neutral universal cleaning without allergenic preservatives.

Cleaner and cloths are declared and labeled in collaboration with the Asthma and Allergy Denmark. Local workplace requirements must be observed. Safety Data Sheet submitted on request.

Produced in Germany under cGMP.
