

Ethanol Disinfection 70%

Approved by the Danish Veterinary and Food Administration for:

”Use as a disinfectant in food processing industry etc.”

J. no.: 2014-29-7105-00025

Item No: 50536: Wet Wipe Ethanol Disinfection 70 %, Maxi Blue Roll

Box contains 2 tubs

One tub holds 400 blue wipes, 30x20 cm

Blue disposable wipes with ethanol for surface disinfection without rinsing with water.

Use

Can be used for disinfecting production and kitchen equipment that comes into direct contact with food. E.g.: knives, cutting machines, scales, production belts/surfaces, packing facilities, samples etc.

No need to rinse with water afterwards (see J. no.: 2014-29-7105-00025).

Testing documentation

This product complies with EU standards EN 1276, EN 1650 and EN 13697 against bacteria and yeast.

Contents

Ethanol 70% by volume, pharmaceutical quality. This ethanol is partly denatured with isopropanol (<5%)

Storage

The ethanol has been absorbed into the wipes, therefore the products are exempt from technical regulations for storage and handling of flammable liquids. This means that the product can be stored in larger quantities compared to liquid ethanol products.

Transport requirements

Must be transported in accordance with rules on the transport of dangerous goods.

Supplier and country of origin

This product was produced by Wet Wipe A/S in Germany. Wet Wipe A/S is on the Article 95 list of active biocidal substance and product suppliers.

Remark

Biocides must be used with care. Always read the label and product information before use.
